Official Checks

Protect your checks the smart way with the Smart Document Series™.
Fight fraud with the Smart Document Series™ from Harland Clarke

Harland Clarke, one of the nation's leading solutions providers to the financial services industry, helps reduce the risk of counterfeit documents with our Smart Document Series™, an economical security strategy designed to combat fraud where it starts.

Security features are your first line of defense.

Our Smart Document Series official documents contain multiple security features to help your employees detect counterfeiting and our formats, styles and colors offer your institution maximum flexibility.

Choose our newly redesigned Hologram Smart Documents which offer at least ten tamper-evident features including an authentic hologram stripe that’s virtually impossible to reproduce or copy.

1. Authentic Hologram
   Harland Clarke’s custom HoloStripe™ security feature provides a reflective, three-dimensional appearance that is easy to verify with the human eye, yet impossible to reproduce by ordinary copying or printing.

2. Prismatic Background Colors
   Attractive prismatic background pattern deters computer fraud and colors distort when copied.

3. Interlocking Background Pattern
   Our interlocking step-and-repeat background pattern distorts when copied.

4. Padlock Icon
   Padlock icon indicates document meets ANSI security guidelines. It also directs readers to the back of the check for a list of security features.

5. Micro-Print Signature Line
   The micro-print signature line reads “AUTHORIZED SIGNATURE,” but when reproduced, type appears as a broken line.

6. Security Inks
   Tamper-resistant security inks and pastel colors guard against the use of solvents and color copying. Harland Clarke documents are made using special solvent-reactive inks that dissolve on contact with organic solvents.

7. Fourdrinier Watermark Stock
   A true watermark shows a negative image in reflected light and a positive image in transmitted light; virtually impossible to fraudulently reproduce.

8. Security Seal
   The back of each document contains a visible Security Seal that will change color when rubbed.

9. Visible and Invisible Fibers
   Visible fibers are randomly embedded into the paper making duplication difficult. Invisible fibers can be seen under a blacklight.

10. Chemical-Reactant Stains
    Stains react with common chemicals to readily show tampering.

11. UV Dull
    Low reflectance in UV light minimizes interference with fluorescent printed features and optical reading.

12. Security Checklist
    Itemized review of features alerts your employees to security characteristics of the document.

Protect your checks the smart way with the Smart Document Series™ from Harland Clarke

Our Traditional Official Documents offer multiple security features for your protection.

Traditional Smart Document

1. High-Resolution Border
   Detailed border distorts when copied, making it apparent to your employees that tampering has occurred. Also acts as an itemized checklist of security features.

2. Padlock Icon
   Padlock Icon indicates document meets ANSI security guidelines. It also directs readers to the back of the check for a list of security features.

3. Micro-Print Signature Line
   The micro-print signature line reads “AUTHORIZED SIGNATURE,” but when reproduced, type appears as a broken line.

4. Micro-Print Security Border

5. Security Seal
   The back of each document contains a visible Security Seal that will change color when rubbed.

6. Fourdrinier Watermark Stock
   A true watermark shows a negative image in reflected light and a positive image in transmitted light; virtually impossible to fraudulently reproduce.

7. Visible and Invisible Fibers
   Visible fibers are randomly embedded into the paper making duplication difficult. Invisible fibers can be seen under a blacklight.

8. Chemical-Reactant Stains
   Stains react with common chemicals to readily show tampering.

9. UV Dull
   Low reflectance in UV light minimizes interference with fluorescent printed features and optical reading.

10. Security Checklist
    Itemized review of features alerts your employees to security characteristics of the document.
